

VO Mail *plus*™

Email is just the start.

VO Mail plus is a complete email and collaboration platform. It features Email, Contacts, Calendar, Documents, File Sharing, Tasks, Chat, plus synchronization to other desktops and devices.

Think of it as a next-generation mail server – in addition to email and calendar, it provides document storage and editing, instant messaging, plus robust sharing capabilities and simplified administrative controls.

Features That Make a Difference

Easy to configure and manage with the cloud

Effective communication powered by rich sharing features

Flexible options to manage features on a per user or group basis

Secure SSL encryption and data storage protects valuable data

Convenient access on any computer or mobile device connected to the internet

User-friendly features like viewing entire message strings, ability to share folders and data, and powerful search features

Integrated Features

Workplace 'Hub'

In addition to all of VO Mail plus' standard features, users can integrate other Virtual Office applications and tools in one central dashboard. Tools such as VO Meeting, VO Project Manager, and VO Docs can further enhance your efficiency and support your bottom line.

Maximum Productivity

When you connect people with the tools they need you increase productivity. But imagine what happens when you also provide them with a way to collaborate and share information without boundaries or geographical limitations. VO Mail plus enables teams and colleagues to work together in a way that has never been possible before. VO Mail plus even permits secure shared access (with assigned logins and permission levels) to third-parties such as vendors, contractors, or subcontractors.

Secure and Compliant

Every VO account comes with an SSL Certificate for your domain(s) which protects information flowing to and from your users from cyber thieves including confidential business or client information such as names, addresses, passwords, account numbers or credit card numbers. Virtual Office also offers email archival and encryption options that can further enhance your ability to secure data and interaction with 3rd parties.
