

Overview

Powerful Web-based Business Platform

The Virtual Office collaboration suite is a powerful web-based business platform that provides users with document storage and editing, instant messaging, and the ability to sync with desktop client applications - all accessible through a central business "hub."

Now, you and your team can access email, manage projects, share work products, conduct web meetings, define workflow automation processes, chat, and auto sync with mobile and desktop client software without limits—and the web interface means that you have full functionality from anywhere in a secure and compliant manner.

The Alternative To Conventional Networking Infrastructures

The Virtual Office collaboration suite offers a secure, cloud based alternative to conventional networking infrastructures. Our platform integrates many of the components of today's most advanced business infrastructures and combines them into one secure, easy to use web resource. Because our entire system is cloud based, it can be accessed from any Internet connected device in the world.

Core to our product platform is the ability to easily share information and files. This feature brings collaboration to a new level and allows co-workers and team members unparalleled tools for working together with no regard to geography.

Features

Sharing Made Simple

With Virtual Office, every resource in the system has the ability to be shared with other users on the system.

True Mobility

With Virtual Office, your office goes where you go. Our solution provides you with a fully functional, easy-to-use, and secure office platform and collaboration tool that is available from anywhere.

Enhanced Efficiency

Virtual Office allows you to easily organize and track your company's data, information, schedules and projects from one central and sharable location.

Effective Technology Solutions

Virtual Office is a simple and secure solution for the technology challenges facing most of today's businesses. With VO, gone are the days of connectivity limitations, inadequate technology, and the costs to maintain or upgrade outdated networking systems.

Secure and Compliant

Virtual Office offers a secure platform that meets or exceeds industry specific requirements.

Products Overview

Core to our product platform is the ability to easily share information and files.

VO Mail plus

Integrates many of the components of today's most advanced business infrastructures and combines them into one secure and easy to use web resource.

Features Include:

Web Mail | Address Book | Calendar | Task List | Briefcase | Instant Messaging | Mobile Web | Auto Sync

VO Archive

A compliant, searchable and incorruptible way to store a copy of all incoming, outgoing and internal correspondence created on your mail server. This feature is ideal (and sometimes required) for many compliance regulated industries.

VO Meeting

This easy-to-use collaboration tool for video conferencing allows users to share (internally or externally) their desktop, documents or presentations.

VO Encrypt

Virtual Office's email encryption tool protects all private, sensitive and valuable information sent out via your VO Mail plus account to ensure that company policies or regulatory guidelines are adhered to.

VO Project Manager

Create detailed project plans for your business by creating and managing schedules, listing tasks, assigning resources, and charting progress. Fully supports gantt charts and dependencies.

VO Docs

The most effective document management and revision tracking solution for workflow automation, managing, storing, retrieving, and revising documents.
