VIRTUAL OFFICE
The freedom of global collaboration

Virtual Office Features

The Virtual Office Collaboration Suite (VO) is a complete and robust office platform that simplifies the way that business is done. Virtual Office provides users with an all-in-one solution for Documents, File sharing, Email, Contacts and Calendaring, Tasks, Social Media, plus synchronization to other desktops and devices. And because it's web-based, it offers true freedom of mobility.

Fully compatible with   

Web Client

- Rich browser-based AJAX interface with application-like features such as drag and drop, tagging and conversation views
- Comprehensive search, including within attachments, and saved search folders
- Share and collaborate with peers including in-boxes, contacts, calendars, documents, files and tasks
- Enterprise calendars with shared free-busy times; interoperable with Microsoft Exchange 2003/2007
- Create shared wiki documents and manage files from a single Briefcase document repository
- Integrate 3rd party services as “mash-ups” or application “tabs”, including twitter and facebook
- Aggregates Yahoo! Mail, Gmail, AOL, Hotmail, and other POP/IMAP accounts
- Sync Yahoo! Mail, Gmail Address Book and Calendar

Administration

- Browser-based AJAX Admin Console
- Migration-wizards for Exchange, Domino, Groupwise, plus standard IMAP migration
- Real-time mailbox backup and restore; native hierarchical storage management(HSM); and high-availability (HA) / clustering
- Cross mailbox discovery and archiving for regulatory compliance
- Integrated Anti-Spam, Anti-Virus, and Directory Services (LDAP, Active Directory)
- Open web service APIs / REST interfaces

Hosted Domain Administration

- Role-based delegated administration to create domain or limited administration settings per account
- Completely re-brand and Re-skin the Web Client experience to fit your companies needs
- Manage end-user features, quotas, storage policies via Class-of-Service(CoS)

Other Desktops

- MAPI synchronization to Outlook 2003/2007 with full delegate and offline access
- Native synchronization to Apple desktop applications via Virtual Office iSync Connector, plus CalDAV support
- Support for all POP3 / IMAP4 Clients

Mobile

- Native synchronization to BlackBerry handsets via Virtual Office Connector for BlackBerry Enterprise Server (BES). Requires Blackberry Enterprise Server to be in place or purchased by account holder. Call for details.
- Native “over-the-air” synchronization to iPhone, Windows, Palm, and Symbian OS Smartphones as well as many other ActiveSync enabled mobile devices
- Set mobile security policies including device wipe, PINs and device management features on user accounts
- Rich browser-based experience for Virtual Office email, contacts, calendar and files on any XHTML capable device

Browser Support

Microsoft Internet Explorer, Mozilla Firefox, Apple Safari for Microsoft Windows, Apple OS X and Linux desktops

3rd Party Client Support

Microsoft Outlook and Entourage, Mozilla Thunderbird, Apple Mail, Apple iCal, Apple Address book, Mozilla Sunbird, Novell Evolution

Protocol Support

MAPI, IMAP, POP, XML, HTTP/S, SOAP, LDAP, SIP, VoIP, iSync, RSS, Atom, iCal, CalDAV, WebDAV
